DETAILED ACTION

Continued Examination Under 37 CFR 1.114

- 1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 05/23/2003 has been entered.
- 2. Applicant's amendment dated 04/28/2003 has been received and entered.

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 1-5, 7-8 and 10-11 stand rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's admitted prior art (APA), figure 11, in view of Ray et al., US Patent No. 5,701,008.

Regarding claims 1-3 and 10-11, APA discloses an elector-optical device (figure 11) comprising:

Application/Control Number: 09/347,523

Art Unit: 2871

- . a pair of substrates (30, 31);
- . an elector-optical material (39);
- . a plurality of pixels (46);
- . a lens array (L) with a plurality of convex microlenses as claimed;
- . a step portion (LB);
- . a transparent cover (48) adhered to the lens.
- a photo curing resin sealing material would be inherently forming for adhering two substrates together (see APA's specification, page 3, lines 4-5).

The difference between the claims and APA is that the step portion being substantially equal in height to the microlenses. However, Ray et al. do disclose that a step portion can be formed with the height of microlenses as well as the width of the step portion being wider than the entire width of the sealing material (8) (e.g., upper portion of the sealing material) as shown in figure 4. Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to modify APA's elector-optical device having a step portion which is substantially equal in height to the microlenses in order to improve the detection efficiency of detector element (i.e., pixels) (see col. 2, ln. 21).

In addition, in case of no photo curing resin using for sealant, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to form a photo curing resin based material for sealing material because it is notoriously well known in the art using such photo curing resin for the purpose of sealing, and it has been held to be within the general skill of

Application/Control Number: 09/347,523

Art Unit: 2871

a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice.

Page 4

Regarding claims 4-5, and 7-8, since the method of manufacturing the device is merely a list of forming each component and each component must be formed to make the device, the method of manufacturing would be inherent to the device.

Response to Arguments

5. Applicant's arguments filed 04/28/2003 have been fully considered but they are not persuasive as stated above.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Dung Nguyen whose telephone number is (703) 305-0423. The Examiner can normally be reached on Monday-Thursday

If attempts to reach the Examiner by telephone are unsuccessful, The Examiner's supervisor, Robert H. Kim can be reached on 703-305-3492. The fax phone numbers for the organization where this application or proceeding is assigned are 703-746-7730 for regular communications and 703-308-7726 for After Final communications.

Art Unit: 2871

Any inquiry of a general nature or relating to the status of this application should be directed to the group receptionist whose telephone number is (703) 308-0956.
